

ELECTRIC COOKTOPS MASTERPIECE[®] SERIES

Excellent performance, precise control and a sleek elegant profile are just a few of the benefits of these re-engineered electric cooktops. The exclusive SensorDome system monitors the temperature of foods to ensure perfect cooking results every time. Our 13-inch element is the industry's largest and most powerful electric round element, and our CookSmart[®] system offers nine pre-programmed settings to effortlessly cook a wide range of foods. With a variety of state-of-the-art features, Masterpiece[®] Series Electric Cooktops allow you to elevate your cooking to levels never imagined.

ELECTRIC COOKTOPS FEATURES & BENEFITS

★ LARGEST ELECTRIC ELEMENT ON THE MARKET

This huge element is the widest and most powerful round electric element on the market, with 4,000 watts of power for faster heat-up and three zones to efficiently heat a variety of pot sizes, such as a 16" skillet (e.g. accessory CHEFSPAN13-16" pan which fits perfectly on the 13" element).

★ COOKSMART®

Never guess cooking time or temperature again. With 9 pre-programmed modes and auto shut-off, you'll get perfect results every time you cook. Cooking modes: pasta, potatoes, rice, dumplings, vegetables, sausages, milk, rice pudding, and deep frying.

★ BRIDGE ELEMENT

Only Thermador offers a bridge element that incorporates a dual-zone element. Use the bridge element to heat oblong pans and the dual-zone element to heat pans of different diameters.

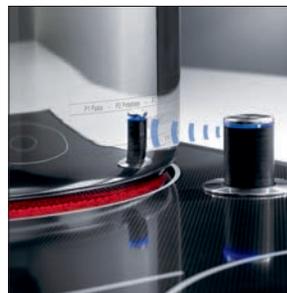

★ SENSORDOME

Because the sensor constantly monitors the temperature and can automatically adjust the heat level and cooking time, you can be sure that your meals are being cooked perfectly. This is the answer to deep frying food, cooking rice and simmering delicate sauces.

★ THERMADOR SENSORDOME POTS

Special Thermador SensorDome pots are available to order as accessories. These pots are optimized for CookSmart Sensor Cooking and work with electric and induction technology. They are ergonomically designed for easy handling, ovenproof and heat-insulated for improved energy savings.

★ HOW IT WORKS

This unique retractable sensor utilizes an infrared beam that continuously measures the heat from the cookware. The sensor shuts the burner off, as well as cycles it on and off, to maintain the precise temperature needed. The result is time savings combined with superior cooking performance—without the guesswork or the need to constantly adjust the temperature.

★ TOUCH CONTROL

The handsome control panel gives you immediate access to 17 power settings, a keep warm, fast preheat and a panel lock function.

MODEL OPTIONS

There are two sizes of Masterpiece® Electric Cooktops to choose from—30-inch and 36-inch. Models are available with mechanical controls and touch controls in a variety of cooktop configurations to fit your client's cooking style. In addition, you can choose models with our exclusive SensorDome system which monitors the temperature of foods to ensure perfect cooking results every time. Be sure to reference the correct model information in this design guide.

INSTALLATION CONSIDERATIONS

The information in this design guide provides key features, product dimensions, cutouts and installation specifications. Before installing a Thermador Masterpiece® Electric Cooktop, be sure to verify the cutout dimensions and electrical connections. Also, always consult with the installation manual packed with the product for complete details before installing.

Thermador Masterpiece® Electric Cooktops may be installed above a Thermador Single Built-in Oven as long as there is no contact between the bottom of the cooktop and the top of the oven. **See below for approved cooktop over oven installation.**

Cooktops that are not listed above, must be approved under local code and/or by the local authority having jurisdictions.

Thermador Masterpiece® Electric Cooktops may also be installed above a Thermador Warming Drawer to create a convenient cooking center. Refer to the warming drawer section for additional specifications.

Solid surface countertops require a special cutout size and installation. For example, heat reflective tape or rounded corners may be necessary. Contact the countertop manufacturer for instructions specific to your countertop.

We strongly recommend the installation of a Thermador Ventilation System with all Masterpiece® Electric Cooktops. Refer to the ventilation section for specifications.

WARRANTY

Limited warranty parts and labor (2 year)

Limited warranty for glass ceramic surface/ electronic elements and switches; Parts only (2nd to 5th year)

See page 306 for additional warranty details.

ELECTRICAL SPECIFICATIONS

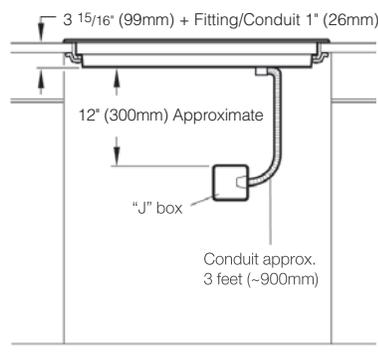

Be sure your appliance is properly installed and grounded by a qualified technician. Installation, electrical connections and grounding must comply with all applicable local codes.

All Thermador Electric Cooktops are dual rated, designed to be connected to either 240/208V AC, 60 Hz, 3-wire, single-phase power supply.

Install a suitable conduit box (not furnished). An appropriately-sized, UL-listed conduit connector must be used to correctly attach the conduit to the junction box.

MODEL	REQUIRED CIRCUIT BREAKER	
	240V, 3-Wire, 60 Hz	208V, 3-Wire, 60 Hz
CEM304FS	40 Amp	30 Amp
CES304FS	40 Amp	30 Amp
CET304FS	40 Amp	30 Amp
CEM365FS	50 Amp	50 Amp
CES365FS	50 Amp	40 Amp
CES366FS	50 Amp	40 Amp
CET366FS	50 Amp	40 Amp

IMPORTANT: Local Codes may vary; installation, electrical connections and grounding must comply with all applicable local codes. If required by the National Electrical Code (or Canadian Electrical Code), this appliance must be installed on a separate branch circuit.

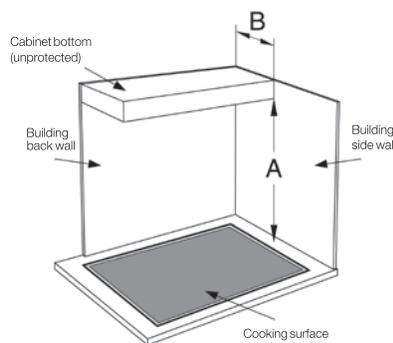

ELECTRICAL LOCATION

The junction box must be located within 3 feet (~900 mm) of the cooktop connection. It should be easily accessible for service purposes.

CABINET REQUIREMENTS

The distance from the top of the cooktop to the bottom of the cabinets above it must be A = 30" (762 mm) minimum. This distance can be reduced to A = 24" (610 mm) when the bottom of the wood or metal cabinet is protected by not less than 1/4" (6.35 mm) flame retardant millboard, covered by no. 28 steel sheet 0.015 (.4 mm) thick stainless steel, 0.024" (0.6 mm) aluminum, or 0.020" (0.5 mm) thick copper, at a minimum. Verify that the cabinets above the cooktop are a maximum of B = 13" (330 mm) deep.
