

MODELS SHOWN: T24IW800SP 24-INCH WINE PRESERVATION COLUMNS WITH TFL24IW800 FLAT STAINLESS STEEL PANELS AND PROFESSIONAL HANDLES

REFRIGERATION FREEDOM® COLLECTION

Freedom to customize. Freedom to go modular. Freedom to integrate your refrigeration with the design of your kitchen. That's what makes Thermador Freedom Refrigeration the leader in true flush, tall door design. Our refrigeration solutions integrate seamlessly into your kitchen design, with custom fronts and concealed venting grille.

Our portfolio of custom panel models—available in 18", 24", 30" and 36" widths—offers the most design choices in the industry, allowing you to configure your own unique combination of bottom freezers, fresh food, freezer and wine preservation columns. And nothing beats the convenience of our pre-assembled bottom freezers, ready to install straight from the factory. Equipped with flat stainless steel panels and either Professional or Masterpiece® Handles set off by a removable stainless steel frame, these units deliver perfect built-in fit and aesthetics in a 24" or 25" deep cabinet.

True to the Thermador heritage and re-imagined for 2012 with a range of state-of-the-art functionality and features, the Freedom Refrigeration collection gives you full control to design your personal culinary studio.

FREEDOM® COLLECTION DESIGN INSPIRATION

The Thermador Freedom Collection facilitates a complete range of new and unique possibilities for your cutting-edge kitchen design. Choose models with custom panels for fully flush integration into the surrounding kitchen cabinetry or pre-assembled bottom freezers for popular, effortless installations.

All models are stand-alone independent units—use your imagination to arrange them into your kitchen as desired—either as single columns or in a wide array of possible side-by-side combinations. It's complete freedom of choice—and freedom of kitchen design.

Side-by-Side T18IW800SP 18-Inch Wine Preservation Columns With TCH18IW800 Chiseled Stainless Steel Panels and Masterpiece Handles. Stand-alone T30IF800SP 30-Inch Freezer Column and T30IR800SP 30-Inch Refrigerator Column, each with TCH30IR800 Chiseled Stainless Steel Panels and Masterpiece Handles.

T36IT800NP French Door Bottom Freezer with TCH36IT800 Chiseled Stainless Steel Panels, Professional Handles and FRAMEKIT10 Stainless Steel Frame.

Stand-alone T24IR800SP 24-Inch Refrigerator Column with TFL24IR800 Flat Stainless Steel Panel and Stand-alone T24IW800SP 24-Inch Wine Preservation Column with Custom Panel, each with Professional Handles.

T24IW800SP 24-Inch Wine Preservation Column and T36IB800SP 36-Inch Bottom Freezer each with Custom Panels and Handles, Separated by a Partition.

FREEDOM® COLLECTION, FRESH FOOD COLUMN FEATURES & BENEFITS

INTERIOR DESIGN

Our Freedom Fresh Food Collection is beautifully redesigned to offer a clean, spacious interior look, while silver trim adds a luxurious accent. New controls feature sleek silver buttons, fully integrated into the interior design.

INTERIOR RACK SYSTEM

The freedom to customize storage like never before with full-length metal cantilever racking and fully flexible rack positions.

PERFECT INSTALLATION

Our new door panel design allows for perfect adjustability. Every door panel can be adjusted horizontally, vertically, forward and backward to ensure an ultra-flush installation.

DEDICATED EVAPORATOR & COMPRESSOR SYSTEMS

Each column has its own evaporator and compressor to eliminate odor transfer, keep food fresher, longer, with better humidity and air flow.

THEATER LED LIGHTING

A new innovation in our Thermador Freedom Collection, theater LED lighting illuminates stored items from both the front and the sides—so that all food can be seen—and nothing remains overlooked or forgotten. Lighting fades in when unit is opened for a luxurious effect.

DOOR STORAGE

Maximize shelf space with large door bins, multiple configuration options, and gallon door storage. Innovative “cool door” design allows air to circulate behind door bins, keeping them as cool as interior shelving.

CLIMATE-CONTROLLED DRAWERS

Ensure the perfect storage and preservation of meats, fish and produce with dedicated convertible temperature drawers.

FULL-EXTENSION DRAWERS

Full-extension drawers offer convenient access. Drawers can even be opened with a 90° door opening, accommodating many kitchen designs. Drawer rails are designed to glide perfectly even when fully loaded.

FREEDOM HINGE

Engineered specifically for the Freedom Collection, all units feature a heavy-duty hinge that can open to 115°, allowing full-height, integrated doors and Truly Flush Mounted™ installation without sacrificing accessibility. The hinge is able to support virtually any custom wood panel. See page 240 for details.

FREEDOM® COLLECTION, FREEZER COLUMN FEATURES & BENEFITS

INTERIOR DESIGN

Our Freedom Freezer Collection is beautifully redesigned to offer a clean, spacious interior look, while silver trim adds a luxurious accent. New controls feature sleek silver buttons, fully integrated into the interior design.

INTERIOR RACK SYSTEM

The freedom to customize storage like never before with full-length metal cantilever racking and fully flexible rack positions.

PERFECT INSTALLATION

Our new door panel design allows for perfect adjustability. Every door panel can be adjusted horizontally, vertically, forward and backward to ensure an ultra-flush installation.

DEDICATED EVAPORATOR & COMPRESSOR SYSTEMS

Each column has its own evaporator and compressor to eliminate odor transfer, keep food fresher, longer, with better humidity and air flow.

FREEDOM HINGE

Engineered specifically for the Freedom Collection, all units feature a heavy-duty hinge that can open to 115°, allowing full-height, integrated doors and Truly Flush Mounted™ installation without sacrificing accessibility. The hinge is able to support virtually any custom wood panel. See page 240 for details.

THEATER LED LIGHTING

A new innovation in our Thermador Freedom Collection, theater LED lighting illuminates stored items from both the front and the sides—so that all food can be seen—and nothing remains overlooked or forgotten. Lighting fades in when unit is opened for a luxurious effect.

FULL-WIDTH ICE DRAWER

Ultra capacity ice drawer with flexible ice bin allows you to place the bin wherever you want it on the left or right hand side. Entertaining? Simply remove the ice bin and use the entire drawer for your ice—stores up to 10 pounds.

HIDDEN ICE MAKER

Hidden compartment houses the ice maker in an inconspicuous new design.

FULL-EXTENSION DRAWERS AND OVERSIZED FREEZER BASKETS

Full-extension drawers offer convenient access. Drawers can even be opened with a 90° door opening, accommodating many kitchen designs. Drawer rails are designed to glide perfectly even when fully loaded.

STAINLESS STEEL EXTERIOR ICE & WATER DISPENSER

An industry first: our freezer units offer a fully stainless steel exterior ice and water dispenser, integrating perfectly with the Thermador stainless steel door panels, as well as all other Thermador stainless steel products.

FREEDOM® COLLECTION, BOTTOM FREEZER FEATURES & BENEFITS

INTERIOR DESIGN

Our Freedom Bottom Freezer Collection is beautifully redesigned to offer a clean, spacious interior look, while silver trim adds a luxurious accent. New controls feature sleek silver buttons, fully integrated into the interior design.

INTERIOR RACK SYSTEM

The freedom to customize storage like never before with full-length metal cantilever racking and fully flexible rack positions.

DUAL EVAPORATOR & DUAL COMPRESSOR SYSTEMS

Each cooling compartment—refrigerator and freezer—has its own evaporator and compressor to eliminate odor transfer, keep food fresher, longer, with better humidity and air flow.

DOOR STORAGE

Maximize shelf space in bottom freezers with large door bins, multiple configuration options, and gallon door storage.

FULL-EXTENSION DRAWERS AND FREEZER BASKETS

Full-extension drawers offer convenient access. Drawers can even be opened with a 90° door opening, accommodating many kitchen designs. Drawer rails are designed to glide perfectly even when fully loaded.

THEATER LED LIGHTING

A new innovation in our Thermador Freedom Collection, theater LED lighting illuminates stored items from both the front and the sides—so that all food can be seen—and nothing remains overlooked or forgotten. Lighting fades in when unit is opened for a luxurious effect.

DELI DRAWER

Complement market-fresh meats, fish and dairy products with a perfectly chilled full-extension deli drawer.

FREEDOM HINGE

Engineered specifically for the Freedom Collection, all units feature a heavy-duty hinge that can open to 115°, allowing full-height, integrated doors and Truly Flush Mounted™ installation without sacrificing accessibility. The hinge is able to support virtually any custom wood panel. See page 240 for details.

PERFECT INSTALLATION

Our new door panel design allows for perfect adjustability. Every door panel can be adjusted horizontally, vertically, forward and backward to ensure an ultra-flush installation.

FREEDOM® COLLECTION, WINE PRESERVATION FEATURES & BENEFITS

WINE PRESERVATION COLUMNS

Our Freedom Wine Preservation Collection redefines the home wine cellar. Perfect for storing and serving at a dinner party or aging the choicest bottles to perfection, this redesigned appliance is the wine connoisseur's newest best friend.

THEATER LED LIGHTING

A new innovation in our Thermador Freedom Collection, theater LED lighting illuminates each bottle of a precious wine collection. Lighting fades in when unit is opened for a luxurious effect.

DUAL INDEPENDENT TEMPERATURE AND HUMIDITY CONTROL

Store any wine collection at the perfect temperature and humidity. Our electronic control board allows you to adjust each zone independently—and keeps wines perfectly preserved.

5-BOTTLE PRESENTER

Inside the appliance an added aluminum 5-bottle presenter ensures the best bottles are center stage. Remove it to double as a handy bar or tabletop presentation option.

FREEDOM HINGE

Engineered specifically for the Freedom Collection, all units feature a heavy-duty hinge that can open to 115°, allowing full-height, integrated doors and Truly Flush Mounted™ installation without sacrificing accessibility. The hinge is able to support virtually any custom wood panel. See page 240 for details.

PERFECT INSTALLATION

Our new door panel design allows for perfect adjustability. Every door panel can be adjusted horizontally, vertically, forward and backward to ensure an ultra-flush installation.

FULL-EXTENSION EXOTIC WOOD RACKS

Completely redesigned wine storage features new rack spacing and flexible storage options. Luxurious, full-extension exotic wood racks enhance the experience of pulling out your favorite vintage.

See page 241 for details

FREEDOM® COLLECTION PLANNING CHECKLIST

This custom product requires attention to the finest details. Did you remember to...?

- Choose a desired configuration – side-by-side or stand-alone columns (See pages 233-237 for details)
- Plan the cutout height(s) – 84" (See pages 233-237 for details)
- Plan the cutout width(s) – depends on configuration and column width (See pages 233-237 for details)
- Plan the cutout depth – 25" for North American style cabinets, 24" with installation frame accessory, 24" for European style cabinets (See pages 233-237 for details)
- Ensure the cutout interior (top and sides) is flush to the appliance at a depth of min. 4", preferably 6" from face frame (See pages 233-237 for details)
- Ensure the cutout interior returns (top and sides) are finished to match exterior at a depth of min. 4", preferably 6" from face frame (See pages 233-237 for details)
- Ensure proper clearance for appliance doors including handle(s) – check for interference with other appliances, open or closed cabinets and doors, nearby walls (See page 230 for details)
- Properly site the electrical outlet and (if applicable) water box (See page 232 for details)
- Choose the door panel type – flat (TFL series) or chiseled (TCH series) stainless steel accessory panels or design custom panel(s) (See page 240 for details)
- Ensure the reverse of any custom panel is finished to match the exterior
- Choose the handle style – Professional (PR36HNDL10), Masterpiece® (MS36HNDL10) or custom
- Choose the correct handle length – normally PR36HNDL10 or MS36HNDL10 – shorter handle (PR30HNDL10 or MS30HNDL10) for 30" bottom freezer (T30IB800SP) drawer only
- Choose the toe-kick style – stainless (included with appliance) or design custom toe-kick(s) (See page 238 for details)
- Procure the proper installation accessories – stainless steel frame kit (FRAMEKIT10) for framed installations in 24-inch deep cutouts, heater kit (HEATRKIT10) for uncommon side-by-sides (any combination not involving a freezer column) heater kit for installations of columns that are not side-by-side, but six inches or closer to one another, heater kit for humid areas (any configuration or installation type) (See page 241 for details)
- If applicable, procure the proper water filter accessories – additional replacement filters (REPLFLTR10), filter by-pass (SCRNFLTR10) for in-home water filtration system (See page 241 for details)

FREEDOM® COLLECTION SUGGESTED COMBINATIONS

Thermador's Freedom Collection uses independent columns that create unlimited flexibility in both function and design. Some suggested pairings are listed below. A special kit is included with all freezer columns to simplify traditional side-by-side refrigerator/freezer combinations. When combining two appliances where one is not a freezer column or if any two units are installed less than 6" (152 mm) apart from one another but not connected side-by-side, always use the Heater Kit (HEATRKIT10) to guard against damaging condensation build-up.

FREEDOM® COLLECTION INSTALLATION OPTIONS

The Freedom Collection offers a variety of installation possibilities*. In some instances, special accessories are required.

RECOMMENDED INSTALLATIONS	CONSIDERATIONS
STAND-ALONE 	<p>Any Freedom appliance can be installed as a stand-alone unit. Ensure a cutout flush to the appliance at a depth of minimum 4" (102 mm), preferably 6" (152 mm) on the top and sides.</p>
SIDE-BY-SIDE 	<p>When two appliances are installed side-by-side a sealing kit must be used. For combinations that involve a freezer column, this kit is provided. For all other (non-traditional) side-by-side combinations or instances where any appliances are installed less than 6" (152 mm) apart from one another but not connected side-by-side, purchase the Heater Kit (HEATRKIT10).</p>
SPLIT COLUMNS WITH PARTITION 	<p>When dimensioning the partition, note the thickness of the door panel (including handles) as well as the swivel range to prevent damage if the doors are opened at the same time. (See page 239 for details on door swivel range dimensions)</p> <p>Three appliances can be installed together only if a partition—minimum 5/8" (16 mm)—is placed between two of the appliances. Ensure that door panel thickness (including handles) as well as the swivel range are accounted for.</p>
AT THE END OF A CABINETY RUN 	<p>All Freedom appliances must be completely enclosed on the top and sides. If one side of the appliance is visible, a decorative side panel must be used. The side panel must be connected firmly to the wall, the floor and any overhead furniture/fixtures before the appliance is placed in the cutout.</p>
NOT RECOMMENDED	CONCERNS
	<p>It is absolutely essential to ensure that the appliance is installed in such a way that the doors do not interfere with an adjacent wall or other kitchen elements. (See page 239 for details on door swivel range dimensions)</p>
	<p>A partition—minimum 5/8" (16 mm)—is required to ensure the doors do not interfere with one another when opened. Use a partition to separate appliances and observe the door swivel range. (See page 239 for details on door swivel range dimensions)</p>
	<p>A Thermador French Door Bottom Freezer cannot be connected side-by-side with any other appliance. Use a partition to separate appliances and observe the door swivel range. (See page 239 for details on door swivel range dimensions)</p>

*The Thermador warranty shall apply only to recommended installations.

INSTALLATION CONSIDERATIONS

LOCATION

The appliance should be installed in a dry, ventilated room. It may not be installed outdoors. The ambient temperature of the room must be between 55°F (13°C) and 100°F (43°C).

The appliance should not be exposed to constant direct sunlight or excessive heat. If installation next to a heat source, such as an oven, radiator, etc. is unavoidable, use a suitable insulating plate or observe the following minimum distances from the heat source:

- 1 1/4" (30 mm) from an electric cooking appliance,
- 11 13/16" (300 mm) from an oil or solid-fuel cooking appliance.

INSTALLATION AND CUTOUT DIMENSIONS

Please see pages 233-237 for complete cutout planning information.

It is important to observe the specified dimensions of the installation cutout for a trouble-free installation of the appliance and for the subsequent appearance of the door panel.

- In particular ensure that the cutout is square. Squareness can be checked by suitable means, e.g. spirit level, diagonal measurements, etc.
- The side walls of the cutout must be flush. The minimum thickness of the side and top walls is 5/8" (16 mm). The minimum thickness of toekick panel is 1/4" (6 mm).

FURNITURE/FIXTURES

During installation, the appliance is fastened to adjacent and overhead furniture/fixtures and it is therefore essential that all such furniture/fixtures are well secured to the substructure or adjacent wall.

FLOORING/SUBSTRUCTURE

On account of the heavy weight of a fully loaded appliance, a load-bearing substructure is required. To ensure correct installation and function, the support must be flat, level and made of hard, rigid material. If in doubt, contact an architect or a building expert.

Refer to the following table for load-bearing capacity:

APPLIANCE	LOAD BEARING CAPACITY
24-Inch Fresh Food Column	890 lbs. / 400 kg
30-Inch Fresh Food Column	1,110 lbs. / 500 kg
18-Inch Freezer Column	560 lbs. / 250 kg*
24-Inch Freezer Column	780 lbs. / 350 kg*
30-Inch Freezer Column	950 lbs. / 425 kg
30-Inch Bottom Freezer	900 lbs. / 410 kg
36-Inch Bottom Freezer	1,200 lbs. / 540 kg

*Without water dispenser

WARRANTY

Limited two-year warranty—for two years from the date of original purchase, we will provide, free of charge, parts and service labor in your home to repair or replace any part of the refrigerator that fails because of a manufacturing defect.

Limited warranty on sealed refrigeration system**; parts and labor (3rd–6th year)

Limited warranty on sealed refrigeration system; parts only (7th–12th year)

See page 302 for additional warranty details.

**Sealed refrigeration system includes compressor, evaporator, condenser, dryer/strainer and connecting tubing

FREEDOM® COLLECTION PLANNING INFORMATION

ELECTRICAL SPECIFICATIONS

The appliance comes with a 3-wire power supply cord. UL listed in the USA.

The appliance requires a 3-wire receptacle that is fitted with a 15 Amp fuse or higher. Refer to the following table for max load details.

APPLIANCE	MAX LOAD
	240/208V AC, 60Hz
24-Inch Fresh Food Column	1.50 Amps
30-Inch Fresh Food Column	1.50 Amps
18-Inch Freezer Column*	3.06 Amps
24-Inch Freezer Column*	3.70 Amps
30-Inch Freezer Column*	4.20 Amps
30-Inch 2-Door Bottom Freezer*	4.90 Amps
36-Inch 2-Door Bottom Freezer*	4.90 Amps
36-Inch French Door Bottom Freezer*	4.90 Amps
18-Inch Wine Preservation Column	0.81 Amps
24-Inch Wine Preservation Column	0.90 Amps

*Including ice maker

The receptacle must be installed by a licensed electrician only.

For the installation position of the receptacle refer to diagram in "Electrical Location".

GROUNDING INSTRUCTION

This appliance must be grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for the electric current.

ADDITIONAL GROUNDING PROCEDURE

Some local regulations may require a separate ground. In such cases, the required accessory ground wire, clamp and screw must be purchased separately. Never ground the appliance to plastic plumbing lines, gas lines or water pipes.

A 4-conductor cord shall be used when the appliance is installed in an area where local codes do not permit grounding through the neutral. Power supply cord must be replaced by a licensed electrician only.

WARNING

Improper connection of the equipment grounding conductor may result in electric shock. Have the appliance checked by a qualified electrician or service technician if you are in doubt as to whether the appliance has been properly grounded.

X	18" (457 mm)	24" (610 mm)	30" (762 mm)
Y	9" (229 mm)	12" (305 mm)	15" (381 mm)

SIDE-BY-SIDE INSTALLATION

WATER LOCATION

A cold water connection is required for appliances that feature an ice maker or an ice and water dispenser.

The water pressure must be between 40 and 120 p.s.i. (2.75-8.25 bar). The installation must comply with local plumbing regulations.

A separate shut-off valve must be installed for the appliance water connection.

The shut-off valve for the water connection may not be behind the appliance. It is recommended to place the shut-off valve outside the cutout next to the appliance or in another easily accessible location. When installing the water connection, observe the permitted installation areas for the water supply line. The supply line can be located to the right (a), to the left (b), or underneath (c).

CABINETRY TERMS & BASIC REQUIREMENTS

To clarify the terms that are used in this design guide, please refer to the following definitions:

CASE

This is the main body of a kitchen cabinet.

(CABINET) FACE FRAME

This is a decorative frame at the front of a kitchen cabinet representing the space between cabinetry doors or drawers and is typical for North America. European style cabinets (frameless cabinetry) typically do not have a face frame.

DOOR PANEL

Able to be fully flush integrated when installed in 25" (635 mm) deep cabinets, Freedom Collection refrigerators are intentionally designed to be equipped with custom door panels that perfectly match surrounding kitchen cabinetry. Typical panel thickness is 3/4" (19 mm). However, thicker panels can be accommodated to emulate the look of the visible face frame (as in overlay) or to match existing kitchen cabinetry doors. When using custom panels, always ensure that the panel reverse is finished to match the exterior, as parts of the panel reverse will be visible when the refrigerator door is opened.

CUTOUT (NICHE)

The cutout is the cavity in which a Freedom Collection appliance is installed. The width of the cutout (18-inch, 24-inch, 30-inch, etc.) is dependent on the appliance(s). The total depth of the cutout is equal to the depth of the case plus face frame. It does not necessarily include the thickness of the door panel. For proper planning of cutout depth, please refer to pages 233-237.

Typically, the cutout for a Freedom Collection appliance will be 25" (635 mm) deep. When planning the cutout, it is essential that the top and side interior walls be flush to the appliance at a minimum depth of 4" (102 mm) from the outer edge of the face frame and composed of thick (5/8" (16 mm) minimum) material for secure installation. Also, because the case interior will be partially visible when the refrigerator door is opened, always ensure that the top and side returns are finished to match the exterior furniture at the same minimum depth of 4" (102 mm).

KITCHEN CABINETRY ILLUSTRATION

FREEDOM® COLLECTION INSTALLATION DIMENSIONS

CABINTRY STYLE & CUTOUT DEPTH

Freedom® Collection refrigeration appliances are designed to accommodate nearly any type of kitchen cabinetry door installation. Generally, when using standard 3/4" (19 mm) panels, 25" (635 mm) deep cutouts are recommended but the required cutout depth depends on the desired cabinetry and custom panel execution, whether typical North American styles that employ a face frame—requiring a depth of 25" (635 mm)—or European style—requiring a depth of 24" (610 mm).

The below cabinetry styles detail requirements for the cutout and custom panel.

A) STANDARD (PARTIAL) OVERLAY – 25" (635 MM) CUTOUT DEPTH

With standard overlay kitchen cabinetry the face frame is an important design element. In order to emulate this aesthetic for the refrigerator, one must account for the door panel thickness (typically 3/4" (19 mm)) as well as the face frame thickness (here, also 3/4" (19 mm)). The resulting thickness of the custom door panel is therefore 3/4" (19 mm) + 3/4" (19 mm) = 1 1/2" (38 mm). The cumulative thickness of the custom door panel requires added depth in the cutout so 25" (635 mm) is recommended (see sketch).

B) FULL OVERLAY – 25" (635 MM) CUTOUT DEPTH

The requirements for standard overlays are also valid for full overlay designs so 25" (635 mm) cutout depth is recommended. However, especially if kitchen cabinet doors are thinner than 3/4" (19 mm) or reveals are 1/8" (3 mm) or smaller, a 24" (610 mm) cutout depth may also be acceptable. In this execution both the cabinet door and the small reveal of the fully overlaid face frame must be emulated within the typical appliance door panel thickness of 3/4" (19 mm). This can be done either a) by simply ignoring the visible area of the face frame (very small reveals show virtually no face frame) or b) by creating a "nose" on the custom door panel to emulate a small visible face frame (see sketch).

C & D) OFFSET & FLUSH INSET – 25" (635 MM) CUTOUT DEPTH

Here, kitchen cabinetry door panels do not rest atop the cabinet face frame (overlay), but are instead inserted partially (offset) or fully flush (inset) into the face frame. Such offset or flush inset door panels require additional depth in the cutout. Using the example of a 3/4" (19 mm) thick panel, the complete cutout depth would be 24" (610 mm) + 3/4" (19 mm) = 24 3/4" (629 mm) and in this example 25" (635 mm) is recommended.

E) FRAMED – 24" (610 MM) CUTOUT DEPTH

For Freedom Collection refrigeration appliances, a metal frame (FRAMEKIT10) may be affixed to the side of the cabinet which conveniently hides unfinished case returns and provides a classic built-in look. This is particularly relevant for existing cabinetry that has not been custom-built to accommodate these appliances. A 24" (610 mm) cutout will result in a slightly protruding door panel for a typical built-in look.

F) EUROPEAN STYLE KITCHEN CABINTRY – 24" (610 MM) CUTOUT DEPTH

If the kitchen design is based on European style cabinetry, there is no need to emulate the look of a face frame, as such a frame is not an element of the kitchen cabinetry design. Therefore a 24" (610 mm) deep cutout with accompanying custom panel will always be sufficient.

A) STANDARD OVERLAY DESIGN
Custom Door Panel (Emulating a Face Frame)

B) FULL OVERLAY DESIGN
Custom Door Panel with Nose (Emulating a Face Frame)

SPLIT COLUMN INSTALLATION

A: Area for running the water line. It is recommended the water-box be placed adjacent to the installation cutout, so that it can be accessed for service without uninstalling the appliance. If this is not possible, place the recessed water box adjacent to the power supply socket elevated at the heights as referenced in areas A+B.

B: Area for installing the power connection

D: Opening depth of cutout, depending on kitchen design (24" minimum)

	X	Y
18-Inch Columns	18" (457 mm)	9" (229 mm)
24-Inch Columns	24" (610 mm)	12" (305 mm)
30-Inch Columns	30" (762 mm)	15" (381 mm)
30-Inch Bottom Freezer	30" (762 mm)	15" (381 mm)
36-Inch Bottom Freezer	36" (914 mm)	18" (457 mm)

IMPORTANT

It is strongly recommended the top interior of the cutout be of solid material (5/8" (16 mm) thickness). Ensure that the top well is completely flush for a depth of at least 4" (102 mm).

Ensure that the side walls of the cutout are also completely flush to a depth of at least 4" (102 mm).

If, for some reason, a separate cutout cabinet is created, ensure that the furniture return is at least 4" (102 mm) deep for proper installation.

PLANNING EXAMPLE #1: FRAMELESS (EUROPEAN) CABINERY

CUTOUT FOR 30" APPLIANCE, FRAMELESS CABINERY:

In this example, the installation cutout is formed by simply leaving a gap between two kitchen cabinets.

The custom door panel $\frac{3}{4}$ " (19 mm) will be identical in appearance and thickness to the surrounding kitchen cabinetry panels.

- cutout width is exactly 30" (762 mm)
- cutout (case) depth is 24" (610 mm)—does not include door panel
- top and side walls of cutout interior are completely flush, of solid material and at least 4" (102 mm) deep

**INSTALLATION CUTOUT
(VERTICAL SECTION)**

30-INCH INSTALLATION CUTOUT (HORIZONTAL SECTION)

FREEDOM® COLLECTION

INSTALLATION DIMENSIONS

SIDE-BY-SIDE INSTALLATION

The cutout width for side-by-side installations is defined by adding together the dimensions of two single columns. Below are the dimensions of a classic 48" side-by-side, with an 18" freezer on the left and a 30" refrigerator on the right.

IMPORTANT: Just as with stand-alone columns, always ensure that the receptacles and the water line are correctly positioned. For dimensional requirements see page 234.

- A: Area for running the water line. It is recommended the water-box be placed adjacent to the installation cutout, so that it can be accessed for service without uninstalling the appliance. If this is not possible, place the recessed water box adjacent to the power supply socket elevated at the heights as referenced in areas A+B.
- B: Area for installing the power connection
- D: Opening depth of cutout, depending on kitchen design (24" minimum)

PLANNING EXAMPLE #2: STANDARD OVERLAY CABINETY

CUTOUT FOR 42" SIDE-BY-SIDE APPLIANCE COMBINATION, STANDARD OVERLAY CABINETY:

In this example, the installation cutout is formed by creating a separate cutout around the appliances. It yields a look that deviates from the general kitchen design.

The custom door panel has a cumulative thickness of 1 1/2" (38 mm), 3/4" (19 mm) emulating the face frame and 3/4" (19 mm) for the actual door panel). Thus, a 25" (635 mm) deep installation cutout is required.

- cutout width is exactly 42" (for an 18" + 24" = 42" side-by-side combination)
- cutout (case) depth is 25" (635 mm) due to 1 1/2" (38 mm) custom door panel
- any furniture return must be at least 4" (102 mm) deep, on interior top and sides, of solid material and should be finished to match the exterior at the same depth (4" or 102 mm)

FREEDOM® COLLECTION INSTALLATION DIMENSIONS

TOEKICK & VENTING GRILLE

Each Freedom Collection refrigeration appliance comes with a 4" (102 mm) tall stainless steel toekick. A custom-made toekick that matches the surrounding cabinetry may be applied instead. While standard toekick height is 4" (102 mm), depending on the usage of the leveling legs, the toekick height could vary. Regardless of toekick height, it is imperative that the venting grille remain unblocked to ensure proper functionality of the appliance. Decorative toekicks should be removable to allow for servicing.

Typical 4" (102 mm) toekick height. Velcro adhesive strips are used to fasten the toekick to the appliance. Venting grille and (if applicable) the water filter cavity are located above the toekick area.

If required by the surrounding cabinetry design, the distance between the bottom edge of the door panel and the floor can be increased from approx. 4" (102 mm) up to 7 1/8" (181 mm), but should not be decreased. Note, however, that the venting grille and (if applicable) water filter cavity will be visible, even if the door is closed.

UPPER MOLDING

The planning of decorative upper molding above the cutout requires taking into account the actual or desired height of the door panel.

The overall height of the door panel will depend on:

- the height of the appliance, typically 84" (2134 mm)—leveling legs allow height adjustment ranging from -1/2" (-13 mm) to +1 3/8" (+35 mm)
- the installed height of the door panel (distance from the bottom edge of the door panel to the floor, typically 4" (102 mm), and, if desired, any extension of the custom panel above the appliance cutout)
- the appliance type (single door or bottom freezer)

IMPORTANT

Please recall that a panel should be installed at a minimum height of 4" (102 mm) from the floor to allow proper ventilation of the appliance.

Always ensure that the top of the cutout or upper decorative molding is at least 4" (102 mm) deep, so that the refrigerator can be properly secured to the cutout wall. This is particularly important if a protruding cutout is specially created and configured with a face frame. Furniture returns for any face frame must be a minimum of 4" (102 mm) deep.

VERTICAL SECTION, SIDE VIEW:

DOOR SWIVEL RANGE

It is absolutely essential to ensure that the appliance is installed in such a way that the doors (including handles) and adjacent cabinets, countertops, pilasters, walls or other kitchen elements do not interfere with one another when opened. The illustrations below depict the swivel range of the Freedom Collection refrigerator doors including mounted door panels of both 3/4" (19 mm) and 1 1/2" (38 mm) thickness.

In the event of door interference the following solutions may be employed:

- Limit the refrigerator door opening angle to 90° with a door stop pin inserted into the hinge.
- Reduce the door panel thickness (if larger than 3/4" (19 mm)).
- Install a spacer between the appliance and the kitchen element that creates the interference.
- Rearrange the opposing kitchen element that creates the problem.
- Create a protruding cutout for the appliance.

DOOR SWIVEL RANGE – 3/4" (19 MM) FLUSH APPLIANCE DOOR PANEL

FREEDOM® COLLECTION

DOOR PANEL DIMENSIONS

Each Freedom Collection refrigeration appliance is designed to be equipped with a decorative door panel. A panel can be custom-made or purchased as a stainless steel accessory. The table below illustrates the dimensions of the stainless steel panel accessories and can be used as a guide in creating custom panels. At 79 7/8" (2029 mm) tall, they are designed for a toekick height of 4" (102 mm), and a total cutout height of 84" (2134 mm) yielding 1/8" (3 mm) reveals. At 3/4" (19 mm) deep, they are designed to attach to the 24" (610 mm) deep appliance for an overall depth of 24 3/4" (629 mm). See page 234 for cutout planning.

When using custom panels, always ensure that the panel reverse is finished to match the exterior, as parts of the panel reverse will be visible when the refrigerator door is opened.

IMPORTANT: While these sketches can serve as a general guide in planning panel dimensions, the correct panel dimensions are dictated by design choices including style and dimensions of surrounding kitchen cabinetry, case and toekick height, etc. Please ensure careful planning based on the specific kitchen design.

INSTALLATION ACCESSORIES

FRAMEKIT10 FREEDOM FRAME KIT

Included with all pre-assembled bottom freezers, this adjustable frame is also available as an optional accessory for use with any custom column for installation in 24-inch (610 mm) deep cutouts. The kit includes two identical and reversible metal side trims whose placement between the interior cutout wall and the appliance helps overcome the challenge of unfinished cabinet returns.

HEATRKIT10 FREEDOM HEATER KIT

When two appliances are installed side-by-side a sealing kit must be used. For combinations that involve a freezer column, this kit is provided. For all other (non-traditional, i.e. two wine columns, two bottom freezers, etc.) side-by-side combinations or instances where any appliances are installed less than 6" (152 mm) apart from one another but not connected side-by-side, purchase this kit. This kit is also recommended for use with any installation in areas that are subject to extreme humidity.

FILTER ACCESSORIES

REPLFLTR10 WATER FILTER

Replacement water filter for use in all freezer and bottom freezer models.

SCRNFLTR10 FILTER BY-PASS

Filter by-pass for use with existing in-home water filtration systems. For all freezer and bottom freezer models.

T18IW800SP

18-Inch Flush, Reversible Door Swing

Build Your Custom Column

See pages 226-227 for details.

SPECIFICATIONS

Bottle Capacity (750 ml)	70
Product Width	17 3/4"
Product Height	84"
Product Depth*	24"
Cutout Width	18"
Cutout Height	84"
Cutout Depth**	25" (24 3/4")
Door Swing Clearance	20 11/16"
Door Swing	Reversible
Annual Energy Consumption	365 kWh
Electrical Supply	120V/15 Amp Circuit
Power Cord Included	120V 3-Wire
Shipping Weight (lbs.)	314

*Depth without door panel

**Minimum cutout depth for flush installation with 3/4" thick panel

Contributes 1 point toward satisfying the high-efficiency appliances credit under LEED®

T18IW800SP

PERFORMANCE

- Dual temperature and humidity wine preservation
- Isolated compressors for vibration reduction
- Dedicated compressor and evaporator
- Electronic controls for precise temperature management
- Tempered and UV-protective glass doors
- Full-extension dark exotic hardwood wine racks
- Carbon air filter reduces odors and keeps air clean and fresh
- Portable aluminum wine presenter
- Sabbath mode
- Economy mode
- Vacation mode
- Door open alarm

DESIGN

- FREEDOM® Hinge enables true flush design
- Full-height door – true cabinet integration without exposed venting grille
- All-LED interior lighting
- Accepts custom or stainless steel panels
- Reversible door swing

TEMPERATURE RANGES

Upper Zone	41°F (5°C) to 64°F (18°C)
Lower Zone	41°F (5°C) to 64°F (18°C)
